The farmer and the Goose

Once upon a time, a farmer had a goose that laid one golden egg every day.

The egg provided enough money for the farmer and his wife for a long time. But one day, the farmer got an idea and thought, “why should I take just one egg a day? “ Why can’t I take all of them at once and make a lot of money? “

The foolish farmer’s wife also agreed and decided to cut the Goose’s stomach for eggs. As soon as they killed the bird, and opened the Goose’s to find nothing but guts and blood.

The farmer realising his foolish mistake, cries for loss over the lost resource. From that day he had nothing to sell. He became poor and starving. **The End**
